Vejledning

Udskriv matematikpengene med udskrivning på begge sider af papiret og klip dem derefter ud.

Der indgår forskellige værdier fra 1 øre (0,01kr.) op til en million kr.

En pengeseddel opfattes i begynderundervisningen ofte som 1kr. uanset tallet på sedlen. Det er derfor vigtigt at arbejde med veksling fra for eksempel en 5kr. Til fem 1kr.

Matematikpengene er også tænkt til at give en forståelse for positionsværdierne, og hvis det er det, der arbejdes med, kan man nøjes med sedler for 1, 10, 100, 1000 op til 1000000, alt efter situationen. Senere kan der udvides med 0,01 og 0,10 for at arbejde med decimaler og forståelsen for dem.

Matematikpengene kan også bruges til brøker: $0,50 = 1/2$, $0,25 = 1/4$, $0,10 = 1/10$ osv.
